

SWIMMING POOL INSPECTIONS

ELECTRICAL INSPECTION

The Electrical Inspector inspects before the trench for the underground wiring is back-filled.

The electrician is responsible for having his work inspected and should know when to call the Electrical Inspector. If there are any questions, please call the Electrical Inspector at 256-4030.

Pool bonding must be accessible and inspected prior to concrete being poured.

Bonding of light-fixture housing and grounding of light-fixture housing must be inspected prior to filling the pool and before back-filling around fixtures.

ABOVE GROUND

The Building Inspector inspects after the Electrical Inspector has inspected, after fence is in, and after the pool is filled.

IN GROUND

Rough Inspection - The Building Inspector inspects after the Electrical Inspector has inspected and before back-filling.

Final Inspection – Is done after the Final Electrical Inspection is done, after permanent fence is in, and after the pool is filled.
